PROFESSIONAL SUMMARY

Dynamics 365 CE and Power Platform Technical Lead with **8+ years of experience** designing, developing, and delivering enterprise CRM solutions across complex business environments. Strong hands-on expertise in **Dynamics 365 CE, Power Apps, Power Automate, Dataverse, PCF Controls, C#, .NET, JavaScript, and Azure services**, with experience across solution architecture, custom development, integrations, security, and deployment. Proven ability to lead end-to-end delivery from **requirements and solution design through development, UAT, deployment, and production support**, while mentoring developers and coordinating cross-functional teams. Experienced in translating complex business requirements into scalable, secure, and maintainable solutions that automate processes, improve data quality, and enhance user experience.

CORE TECHNICAL SKILLS

Dynamics 365 CE

Dynamics 365 CE | Model-Driven Apps | Sales | Business Process Flows | Business Rules | Plugins | Custom Actions | Custom Workflows | JavaScript | HTML Web Resources | Duplicate Detection | Form Customization

Power Platform

Power Apps (Canvas & Model-Driven) | Power Automate | Dataverse | PCF Controls | Access Teams | Custom Validations | Power Platform Solutions

Development & Integration

C# | .NET | JavaScript | REST APIs | Dynamics 365 Web API | Azure Functions | Azure Logic Apps | Azure Service Bus

Security & Data

Dataverse Data Modeling | Security Roles | Role-Based Access | Access Teams | Azure AD / Entra ID Security Groups | Record Sharing | Data Validation | Data Governance

Architecture & Delivery

Solution Architecture | Technical Leadership | Agile / Scrum | Requirements Analysis | Solution Design | Code Reviews | UAT | Production Support | Stakeholder Management

DevOps & ALM

Azure DevOps | CI/CD Pipelines | Release Management | Deployment Coordination | Risk & Dependency Management

Reporting & Analytics

Power BI | Dynamics 365 Dashboards | Custom Views

WORK EXPERIENCE

Lead Developer

Jul 2026 - Current

360 Degree Cloud — Remote

- Lead end-to-end delivery of **Dynamics 365 CE and Power Platform solutions,** contributing across solution architecture, development, integration, deployment, and production support**.**
- Design and develop **Model-Driven Apps, Canvas Apps, and Power Automate solutions** to automate business processes and improve operational workflows.
- Drive technical delivery across multiple workstreams, coordinating **sprint planning, backlog refinement, release activities, dependencies, and delivery tracking through Azure DevOps**.
- Design and implement **Azure Functions, Azure Logic Apps, and Azure Service Bus integrations** to enable two-way communication for broker management processes.

- Translate complex business requirements into scalable CRM and Power Platform solutions while working closely with business stakeholders, technical teams, and delivery leadership.

Senior Software Engineer II — D365 CRM Technical Lead
Oct 2022 - Jul 2026

Impelsys Pvt. Ltd Hyderabad, India (Remote)

- Led the design and delivery of **Dynamics 365 CE and Power Platform solutions** across enterprise environments, covering architecture, customization, development, deployment, and production support.
- Architected and developed **Model-Driven Apps, Canvas Apps, and Power Automate workflows** to automate business processes and reduce manual operational activities.
- Designed **Dataverse data models, security role hierarchies, Access Teams, and role-based access controls** supporting secure data access and governance for **500+ users**.
- Delivered Power Platform enhancements across **three business functions—sales pipeline management, event coordination, and certification tracking—**streamlining business processes and improving operational efficiency.
- Mentored junior developers through **technical design reviews, code reviews, code walkthroughs, and hands-on guidance**, promoting development standards and Power Platform best practices.
- Led requirements analysis and solution-design discussions, translating complex business requirements into **scalable Dynamics 365 CE and Power Platform implementations**.
- Coordinated **Agile delivery, sprint planning, backlog refinement, release coordination, and technical dependencies** using Azure DevOps.

Microsoft Dynamics CRM Developer / Delivery Manager
Feb 2022 - Sep 2022

Wipro Technologies Hyderabad, India (Remote)

- Coordinated CRM delivery across multiple enterprise workstreams, **managing sprint cycles, release schedules, dependencies, and deployment activities.**
- Designed and enhanced **Canvas Apps and Model-Driven Apps** to support business workflows and improve CRM user experience**.**
- Implemented key Dynamics 365 capabilities including **Custom Workflows, Business Process Flows, Business Rules, and Access Teams** to automate approvals, enforce business rules, and support compliance.
- Configured **Dynamics 365 security roles, Azure AD security groups, and user permissions** to implement least-privilege access across enterprise CRM environments.
- Built **dashboards, custom views, and CRM configurations** by translating stakeholder requirements into functional Dynamics 365 solutions.
- Led **Hypercare and post-deployment support**, coordinating application, data, and UI issue resolution within defined SLA requirements.
- Architected and delivered a **Power Apps Canvas solution for global asset management**, enabling self-service workflows for Microsoft employees across multiple regions.

CRM Consultant — Microsoft Dynamics 365
Mar 2018 - Feb 2022

Nayagara Technologies Hyderabad, India (Remote)

- Engineered **30+ Dynamics 365 CE Plugins, Custom Actions, JavaScript enhancements, and HTML Web Resources** to implement complex business requirements and extend standard CRM functionality**.**
- Customized core Dynamics 365 Sales entities including **Leads, Accounts, Contacts, and Opportunities,** and implemented Business Process Flows aligned with client sales processes**.**
- Developed **client-side JavaScript and .NET-based validations** to enforce business rules, improve data integrity, and prevent invalid data from progressing through CRM processes.
- Implemented **Duplicate Detection Rules and cross-entity validation logic** to improve CRM data quality and prevent duplicate records.
- Developed **Canvas Apps and Model-Driven Apps** to streamline business workflows and improve the user experience for enterprise users.
- Led CRM implementations through the complete delivery lifecycle, including **requirements analysis, solution development, UAT, deployment, and post-production support**.
- Collaborated with business stakeholders and technical teams to translate functional requirements into **scalable Dynamics 365 CE solutions**.

PROJECTS

QORA CRS Project Management
Mar 2025 - Apr 2026

Client: American Heart Association (AHA) | Technologies: Dynamics 365 CE, Power Platform

- Designed and delivered a **Dynamics 365 CE solution for AHA's national operations**, supporting **500+ users** across project management, financial tracking, campaigns, compliance contracts, and event relationships.
- Built and enhanced **Model-Driven Apps and Power Automate workflows** to centralize data management and automate approval and compliance processes.
- Implemented **Business Rules, Access Teams, and custom validations** to enforce business logic, data integrity, and role-based record access across 500+ users.
- Translated business requirements into technical solutions and led **sprint planning, implementation planning, functional task breakdown, UAT, and production deployment**.
- Developed Power Platform customizations and automated business processes to streamline operational workflows and reduce manual activities.

QORA Enhancement & Sales/Invoicing Tracker
Oct 2022 - Feb 2025

Client: American Heart Association (AHA) | Technologies: Dynamics 365 CE, Power Platform

- Consolidated **three previously siloed business functions** into a centralized QORA solution supporting sales, event, and certification tracking.
- Designed and delivered **Power Automate workflows** to automate invoice processing, reducing manual processing and administrative effort for finance teams.
- Conducted stakeholder workshops to translate complex nonprofit business requirements into **Dynamics 365 CE business logic, workflows, and Power Platform solutions**.
- Developed **Model-Driven Apps and Dynamics 365 customizations** to streamline business processes and improve user workflows.
- Developed **Plugins and CRM customizations** to implement business rules and extend Dynamics 365 CE functionality.

WFH Asset Shipment Management
Feb 2022 - Sep 2022

Client: Microsoft | Technologies: Power Apps, Power Automate, Azure AD, Dynamics 365

- Architected and developed a **Power Apps Canvas solution for global work-from-home asset management**, enabling self-service workflows for Microsoft employees across multiple regions.
- Implemented **role-based access workflows, dynamic dashboards, and Azure AD security group integration** to support secure and scalable asset management.
- Automated key asset-management processes using **Power Automate**, reducing manual operational activities and improving workflow efficiency.
- Managed post-launch **Hypercare**, including production incident triage, issue coordination, and SLA tracking for a globally distributed user base.
- Owned **sprint planning and release tracking through Azure DevOps**, coordinating delivery milestones with Microsoft stakeholders.

CRM Customization & Sales Module Enhancement
Apr 2020 - Feb 2022

Client: Zurich Cantonal Bank | Technologies: Dynamics 365 CE, Plugins, JavaScript

- Engineered Dynamics 365 CE customizations using **C# Plugins, Custom Actions, JavaScript, and PCF Controls** to automate complex banking business rules and support compliance requirements.
- Designed and developed **custom PCF controls** to extend standard Dynamics 365 functionality and provide tailored experiences for banking-specific data entry and business processes.
- Built **reusable PCF components** with client-side validation and dynamic UI behavior to simplify complex CRM interactions and improve data-entry accuracy.
- Configured **Security Roles, Access Teams, and record-sharing policies** to support enterprise data governance and regulatory requirements.
- Developed **JavaScript form customizations and server-side CRM logic** to enforce business rules and replace manual processes with automated validation and workflow execution.

CRM Customization & Sales Module Enhancement Mar 2018 - Apr 2020

Client: Commerzbank | Technologies: Dynamics 365 CE, Plugin, Workflow, JavaScript

- Developed and integrated **Power Apps Component Framework (PCF) controls** to extend standard Dynamics 365 CE functionality with reusable, customized user interfaces.
- Built PCF components supporting **field-level data entry, validation, and user interactions** for sales users.
- Engineered **C#/.NET Plugins and custom workflow automation** to enforce business rules, automate CRM processes, and maintain data consistency across entities.
- Implemented **JavaScript form customizations and client-side validation** to enforce business-process rules and prevent incorrect data entry.
- Implemented **Duplicate Detection Rules and cross-entity validation logic** to improve CRM data quality and prevent duplicate records.

EDUCATION

Vidwan (BA Arts - Hindi) 1994 - 1997

Hindi Prachar Sabha Hyderabad 50%

Diploma in Computer Science Engineering 2009 – 2012

Calorx Teachers University Gujarat 64%
